Re: Water Service Feasibility Study - North Westside

The Regional District of Central Okanagan (RDCO) has recently received several requests to investigate the feasibility of establishing water service for the residents of Upper Fintry and Valley of the Sun in the North Westside of the Regional District. The RDCO has retained a consultant to complete a feasibility study and provide recommendations for the best approach to service the existing lots with water. Included within the study is the Fintry Delta area because of its close proximity to the other areas.

We would like to make all the residents in the area aware that this study is currently under way and at this time there is no cost to the residents until such a time the residents agree by petition to proceed with the design and construction of a water system. A preliminary meeting with the neighbourhood associations has recently taken place to add input into the study.

It is anticipated that the results of the study will be presented to the residents in the late summer or early fall through a public meeting and also through further correspondence via mail out.

Please forward any questions, comments or concerns to the Regional District of Central Okanagan Engineering Services department, we can be reached at 250-469-6241 or via e-mail at engineer@cord.bc.ca.

Yours truly,

Jennifer Penner
Engineering Technologist
