

# EARTH IS OUR HOME!

## LET'S KEEP IT SAFE AND CLEAN!

**REDUCE** the amount of waste you create. Remember, if you don't buy it, you won't have to throw it away. **RECYCLING** is a good thing! Recycling is a way in which paper, metal, glass, plastic, and other materials can be made into the same or new products and used again. Recycling is a great way to save natural resources, to save energy, to save money, and to save landfill space.

Did you know that paper can be recycled and made into new paper and other things. Recycling 1 tonne of paper saves 17 trees.

### WORD SEARCH

Recycled paper can be made into many things. Some of these things are listed here. Circle each one as you find it.

**TWO IMPORTANT TIPS:** 1. At the store, you and your family should **READ THE LABELS** to find out if the product you want to buy is made from recycled materials. Look for the largest amount of post-consumer recycled content (this is the material you recycle).  
2. **REDUCE USE...TRY TO USE LESS PAPER.**
