PLASTIC, PLASTIC everywhere...even in your underwear? Yes, some t-shirts and fleece jackets are now made from recycled plastic soft drink bottles and milk jugs. Remember to recycle all your cloudy-coloured plastic containers that say #2 on them (milk jugs, vinegar bottles, anti-freeze jugs, and some detergent containers) and to take your beverage containers to the bottle depot for a refund.

GLASS can be recycled and **reused** over and over again...forever. It never wears out! This is a great news because for every tonne of glass recycled, we save over a tonne of the natural resources it takes to make glass. This includes sand and minerals like limestone and soda ash.

The mixed up words below are things that can be reduced, reused or recycled. Unscramble the words, then fill in the boxes to discover one of the easiest things to recycle.

UNMULAIM _ _ _ _ _ ☐ _ _

ANSWERS: Aluminum, garbage, waste, glass, compost, cans, plastic, tires, cardboard

There are many other materials that can be recycled and made into the same or new products. Some of these recyclables include aluminum, steel, tires, motor oil, batteries, some household chemical products (like paint), concrete, asphalt and wood.
