AGGREGATE SUPPLY AND DEMAND ANALYSIS FOR RDCO

Natural Sand and Gravel Potential

LEGEND

- RDCO Pits
- MOTI Pit Locations
- Roads
- TFL49*
- Parks and Protected Areas
- Indian Reserves
- RDCO Administration Boundary
- Natural Sand and Gravel Potential
  - High
  - Moderate
  - Low
  - Thick Till Deposits
  - No Gravel Potential

NOTES:
1. The dataset covering TFL 49 is missing surface expression, therefore, potential in this area may or may not be captured.
2. Natural sand and gravel potential based on provincial TEI data (http://www.env.gov.bc.ca/tei/access_terrain.html). EBA cannot guarantee the accuracy of this data.

Areas that are white (within the RDCO boundary) indicate that we do not have any data for this area.

Base Data Sources:
- Natural sand and gravel potential originates from Province of BC provincial database for Terrestrial Ecosystem Information (TEI), with rules applied to the data to display pertinent information on the natural sand and gravel potential.
- All other base data has been obtained from the Central Okanagan Regional District and is used under their GIS data sharing disclaimer.
