Trail Sections Closed in Mission Creek Regional Park

Short sections of three trails in [Mission Creek Regional Park](#) are closed after a slope slide.

For safety of visitors, Regional Parks staff has closed the area of the park at the Cottonwoods Bridge and three trails on the south side of the creek near the spawning channel up into the Sutherland Hills portion of the park.

Brad Ackerman, Parks Services Operations Manager says “Until slope stability can be assessed, the Regional District urges park users to respect the barricades and trail closed signs.”

The affected portion of the trails will remain closed until further notice.

No debris has made its way into either the spawning channel or Mission Creek.

Visitors are encouraged to use any of the open trails within the 92-hectare regional park or visit www.regionaldistrict.com/pickapark for information about our 29 other regional parks.
